SUBMITTED BY: NEIL POSMER

STRATEGY NAME: COLLABORATIVE PROJECT BASED WEB DESIGN PROJECT

PURPOSE/OBJECTIVES:
Students will collaborate in teams to develop a website for a small business.
Students will be responsible for the planning, development, assessment and troubleshooting of the website.
Students will assess and evaluate teammates on completion of duties.

MATERIALS NEEDED:
Project Based Learning-Project Planning Form
Computers with Adobe CS6 suite
Shared Network Folder
Note paper
Pen and Pencils

PROCESS:
Students will complete the Project Planning Form as a team.

Each team will choose a small business and develop a website for them.
- What is the business selling?
- What type of business are they?
- Who is the businesses market?
- How do they deliver their services and/or products?
- How will having a website help them?

As a team, students will assign duties and roles.
- Supervisor
- Web designer
- Editor
- Art and Animation

Each team will set timelines for tasks to be completed by each team member.

Individually, students will evaluate his/her team members on ability to complete duties and handle responsibilities.

The team will be responsible for troubleshooting and launching a live website.

ADDITIONAL NOTES OR COMMENTS:

This will be an end of class project. Students will already have learned skills related to use of Adobe CS6 suite in order to complete this project. Also, as a class we will have assessed business websites.
