

# Make your own tessellation

Follow the steps below to make your own tessellation. Get your parents or a friend to help with the cutting and taping if you need it.

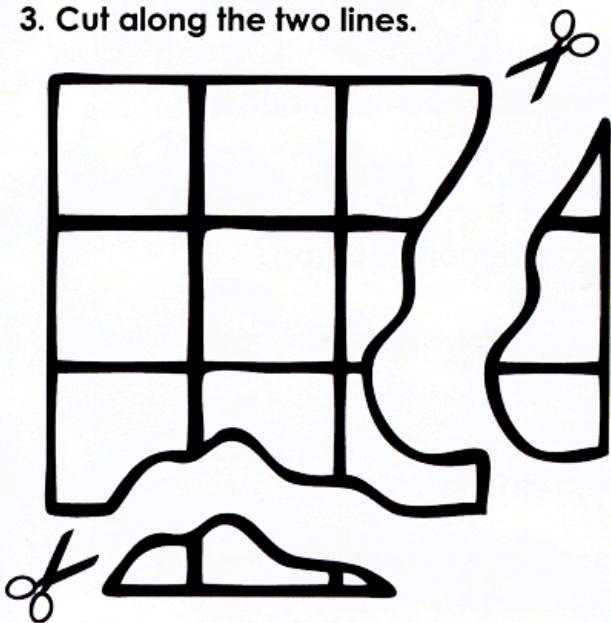

1. Trace the gridded box onto a piece of paper.

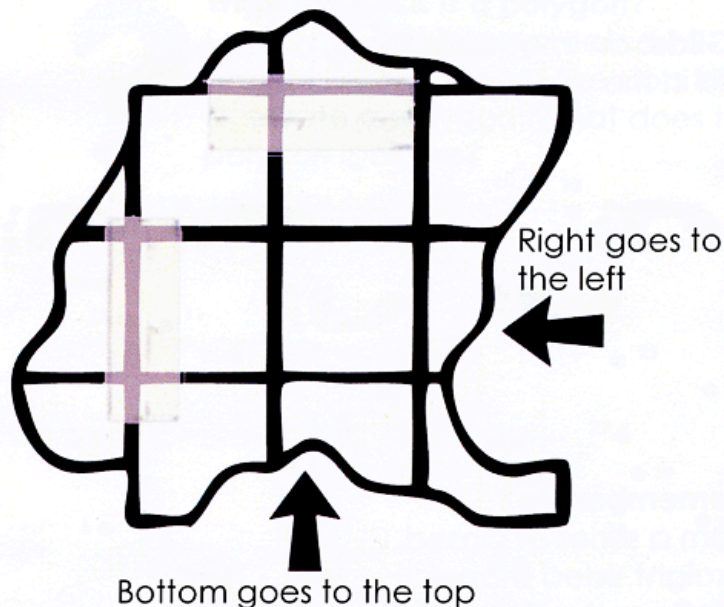

2. Draw two lines on adjacent sides (touching sides) without drawing to the corner.

3. Cut along the two lines.

4. Tape cut pieces to the opposite sides.

5. On a large piece of paper trace your tessellation stencil over and over, lining up each new tracing to the one you just completed. You can work top to bottom or left to right. Fill the page. Does your Tessellation look like anything? A animal or person maybe. Don't be afraid to add details and color.
