Strategy Name: Bulletin Board Project

Purpose/Objectives: Students will learn the importance of communicating with each other during a business process. Each student team member will be a part of a process that in working with others, the team will create a bulletin board.

Materials Needed: Computers, printers, paper, staplers, glue, bulletin boards, tape, any other types of fabrics and materials to design and create a bulletin board.

Process:

Students will be divided into 3 teams and assigned a bulletin board space for your team to create.

Your group will be divided into three groups that will consist of the following:

1. **Management Group** – Responsible for making sure that every aspect that is mandatory for the bulletin board is completed. (Listed below)
2. **Creative Group** – Responsible for drawing out a small mock version of the bulletin board. This group will use a small sheet of paper and design what the bulletin board will look like. This design will act as an instruction manual for the builders.
3. **Building Group** – This group will physically build the bulletin board from the instructions given by the creative group.

Each one of these groups will depend on the other.

You must have the following on your bulletin board:

1. **A backdrop or background.**
2. **The OPRF School of Business Logo**
3. **The Oak Park and River Forest High School Logo**
4. **A famous business quote your team likes**
5. **At least 2 pictures**
6. **One person will keep a typed journal of how your concept to completion occurred.**

Additional Notes / Comments: The bulletin boards will be judged by staff and students to determine a winning board. An evaluation will be given to the students to self-reflect on their process. A discussion will follow with all students breaking down their process and listing good points and points of improvement.
