## Understanding Business Ethics

### **Introduction**

We live in a global economy. But what is ethical in one country is sometimes not ethical in another country.

### **Directions**

Using the Chromebooks, create a SlideShow presentation on the following research:

- You will define a global economy and explain its importance in the business industry. Choose any angle you would like.
- Choose one country in the world and research whether or not bribes are considered ethical or unethical in that country.
- Explain the difference between a bribe and a gift.
- Do you feel it is ethical to give gifts while doing business? Why or why not?
- Although all 7 ethics we studied are equally important, choose the three that you feel are most essential when running a company.
- Explain why you chose these three ethics.
- Write one sentence that summarizes the most important concept learned during this unit on ethics.

### **Components**

- All information listed above must be in your presentation
- You must have *at least* 15 slides and no more than 25
- Include a video from youtube that represents ***either*** business ethics or bribery news from the country you are writing about. Place this video in its appropriate location in your slideshow.
