

PHOTOSHOP BASICS: Changing a Background

Directions:

Create three separate Photoshop files that have altered backgrounds.

Requirements:

You may use any APPROPRIATE images while practicing this skill.

The files should include text for a title and multiple layers.

Experiment with different effects to get a sense of what each one does. This is just a practice activity so have fun with it and don't be afraid to try different ideas. In the next activity, you will use your own images to create ad banners that will be used for a web page.

Video Tutorials:

If you have Photoshop experience, feel free to skip the tutorial.

I did create this videos as a step-by-step instruction. You may watch the video and open Photoshop to complete the tasks along with me.

Please raise your hand if you need assistance.

Turning in Your Files:

Please save your **3 separate files** as .PSD files and upload them to our dropbox.
